MATHEMATICS AND PHYSICS COURSES FOR DIFFERENT BRANCHES

COURSE CODE	COURSE TITLE
MATHEMATICS –II	
MATHS102C	MATHEMATICS –II (For computer Science & Engg)
MATHS104C	MATHEMATICS –II (For Bio-technology)
MATHS106C	MATHEMATICS –II (common for all branches except CSE & BT)
PHYSICS and PHYSICS LAB (Any One Combination)	
PHY101C PHY111C	INTRODUCTION TO ELECTROMAGNETIC THEORY IEMT LAB (For ME, AE, Aero & ECE)
PHY103C PHY113C	MECHANICS MECHANICS LAB (For CE)
PHY105C PHY115C	OPTICS, FIBRE OPTICS, MAGNETISM AND QUANTUM MECHANICS OFMQ LAB (For CHE, BT &BME)
PHY107C PHY117C	WAVES, OPTICS AND QUANTUM MECHANICS WAVES ,OPTICS AND QUANTUM MECHANICS LAB (For EE)
PHY109C PHY119C	SEMICONDUCTOR PHYSICS SEMICONDUCTOR PHYSICS LAB (For CSE)

Note:

- *Effective from the Academic Session 2019-20. Every student has to participate in the MANDATORY INDUCTION PROGRAM OF 07 working day DURATION at the start of regular teaching of first semester. It comprises physical activity, creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to local Areas, Familiarization to Dept/ Branch & Innovations. The remaining equivalent of two weeks (14 days) will be covered during first semester and there will be an examination at semester end.
- All the branches are to be divided into groups 'A' and 'B' as per the suitability of the institute/college, so that there is an equitable distribution of teaching load in odd and even semesters.

GROUP A: CSE, ECE.AERONAUTICAL

GROUP B: CIVIL, ELECTRICAL, MECHANICAL

- Induction Program Chief Coordinator/ coordinators/Mentors shall be assigned a load of 2 hours per week.
- For student admitted in B. Tech. 1st Semester (C-Scheme) in 2019 and all trailing students, Examinations and evaluation of students shall be conducted as per guidelines AICTE Examinations Reforms covering the entire syllabus. The students shall be made aware about the reforms.

SYLLABUS: B Tech

Department: Common for all branches

Subject: ENGLISH LANGUAGE SKILLS (Group.-B)

Subject Code: HUM101C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
2	-	-	2	25	75	3 hours	100

Course objectives:

1. To equip students with English Language skills needed in academic and professional world
2. To make students technically proficient in handling language skills required for competitive exams.
3. To inculcate human/ethical values in the students to ensure their holistic development
4. To develop ability to critically read the literary texts

Course outcomes:

The students will be able to

1. Acquire basic proficiency in English
2. Develop their verbal ability
3. Enhance their writing, reading and analytical skills
4. Develop proficiency in reading along with sensitivity to the impact literary texts can have on their minds/lives

Unit I: Basic Writing skills

- TOPIC NO 1 Subject Verb Agreement
- TOPIC NO 2 Noun Pronoun Agreement
- TOPIC NO 3 Governance of Nouns Through Prepositions
- TOPIC NO 4 Basic Verb Patterns (V, SV, SVO, SVOO, SVC, SVOC, SVOA)

Unit II: Vocabulary Building

- TOPIC NO 5 One word substitution
- TOPIC NO 6 Phrasal Verbs
- TOPIC NO 7 Commonly used Idioms
- TOPIC NO 8 Words/Phrases/Idioms from the texts prescribed in Unit IV-- their meaning and use in sentences

Unit III: Creating Grammatical Cohesion

- TOPIC NO 9 Referring Time in Language (Tenses)
- TOPIC NO 10 Use of Conditional Sentences
- TOPIC NO 11 Use of Active and Passive Voice
- TOPIC NO 12 Synthesis of Sentences using Coordinating and Subordinating Conjunctions

Unit IV: Reading and Writing Practices

- TOPIC NO 13 Literary Texts:
 - A "The Secret of Work" by Swami Vivekananda
 - B "Public Transport in London and Delhi" by Nirad C. Chaudhuri
 - C "An Outline of Intellectual Rubbish" by Bertrand Russell
 - D "Mother Teresa" by Khushwant Singh
- TOPIC NO 14 Writing official Letters- Issues Concerning Students' academic and social life
- TOPIC NO 15 Essay Writing
- TOPIC NO 16 Paragraph Writing

Note: Eight hour time on an average to each unit is recommended for class room teaching purposes.
Scheme of End Semester Examination (Major Test):

1. The duration of examination will be three hours.
2. Nine questions of 15 marks each will be set, out of which the examinees will have to attempt five questions.
3. First question of 15 marks will be compulsory. It will cover all the four units of the Syllabus.
4. The question will have sub- parts with marks assigned against each.
Question No 02 to 09 will be set from the four units of the syllabus --- two from each unit of 15 marks each. The nature of the questions in each unit will depend upon the nature of content therein. Examinees will have to attempt four more questions, selecting one from each unit. The questions may have parts.

Department: Computer Science and Engineering
Subject: MATHEMATICS-II
Subject Code: MATH102C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	1	-	4	25	75	3 hours	100

Course Objectives:

1. To give adequate exposure of basics of Engineering Mathematics so as to enable them to visualize engineering problems by using Mathematical tools and to support their subsequent engineering studies
2. To familiarize with the uses of measure of dispersion and central tendency.
3. To equip with various types of Probability distributions.
4. To familiarize the analysis of statistical data using various distributions.
5. To form a specific relation for the given data using Principle of least square method.

UNIT-I

- TOPIC NO 1. Measures of Central tendency:
 TOPIC NO. 2 Moments, skewness and Kurtosis-
 TOPIC NO. 3 Probability distributions:
 TOPIC NO. 4 Binomial, Poisson and Normal
 TOPIC NO. 5 Evaluation of statistical parameter for these three distributions
 TOPIC NO. 6 Correlation and regression — Rank correlation.

UNIT-II

- TOPIC NO. 7 Curve fitting by the method of least squares-
 TOPIC NO.8 fitting of straight lines, second degree parabolas and more general curves.
 TOPIC NO. 9 Test of significance: Large sample test for single proportion, difference of
 TOPIC NO. 10 proportions, single mean, difference of means, and difference of standard deviations.
 TOPIC NO. 11 Test for single mean, difference of means and correlation coefficients,
 TOPIC NO. 12 test for ratio of variances - Chi-square test for goodness of fit and independence of attributes.

UNIT-III

- TOPIC NO. 13 Probability spaces, conditional probability,
 TOPIC NO. 14 Independence; Discrete random variables,
 TOPIC NO. 15 Independent random variables, the multinomial distribution,
 TOPIC NO. 16 Poisson approximation to the binomial distribution infinite sequences of Bernoulli trials,
 TOPIC NO. 17 Sums of independent random variables;
 TOPIC NO. 18 Expectation of Discrete Random Variables,
 TOPIC NO. 19 Moments, Variance of a sum,
 TOPIC NO. 20 Correlation coefficient,
 TOPIC NO. 21 Chebyshev's Inequality.

UNIT-IV

- TOPIC NO. 22 Continuous random variables and their properties,
 TOPIC NO. 23 Distribution functions and densities, normal, exponential and gamma densities.
 TOPIC NO. 24 Bivariate distributions and their properties,
 TOPIC NO. 25 Distribution of sums and quotients,

TOPIC NO. 26 Conditional densities, Bayes' rule.

Text Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 9th Edition, John Wiley & Sons, 2006.
2. N.P. Bali and Manish Goyal, A text book of Engineering Mathematics, Laxmi Publications, Reprint, 2008.
3. B.S. Grewal, Higher Engineering Mathematics, Khanna Publishers, 36th Edition, 2010.

Reference Books:

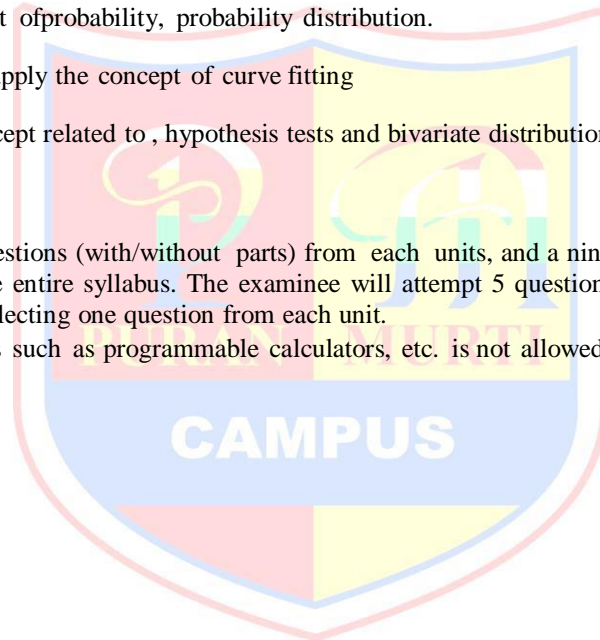

1. P. G. Hoel, S. C. Port and C. J. Stone, Introduction to Probability Theory, Universal Book Stall, 2003 (Reprint).
2. S. Ross, A First Course in Probability, 9th Ed., Pearson Education.
3. W. Feller, An Introduction to Probability Theory and its Applications, Vol. 1, 3rd Ed., Wiley, 1968.
4. Veerarajan T., Engineering Mathematics (for semester III), Tata McGraw-Hill, New Delhi, 2010.

Course Outcomes:

1. The students will be able to apply the concepts of Central tendency in practical work.
2. The students will learn the concept of probability, probability distribution.
3. The students will understand and apply the concept of curve fitting
4. They will be to understand the concept related to , hypothesis tests and bivariate distributions techniques in engineering problem

Note:

1. The paper setter will set two questions (with/without parts) from each units, and a ninth compulsory question comprising of 6 to 10 sub-parts, covering the entire syllabus. The examinee will attempt 5 questions in all, along with the compulsory question (with all it sub- parts), selecting one question from each unit.
2. The use of programmable devices such as programmable calculators, etc. is not allowed during the exam.

Department: Common for all branches (Common for all branches except CSE & IT)

Subject: MATHEMATICS-II

Subject Code: MATH106C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	1	-	4	25	75	3 hours	100

Unit-I

TOPIC NO 1 Multiple Integration: Double integrals, change of order of integration,
 TOPIC NO 2 Triple integral and application, Change of variables,
 TOPIC NO 3 Applications to areas and volumes,
 TOPIC NO 4 Centre of mass and Gravity (constant and variable densities) of solids of revolution,
 TOPIC NO 5 orthogonal curvilinear coordinates,
 TOPIC NO 6 vector line integrals, surface integrals, Volume integral Theorems of Green,
 TOPIC NO 7 Gauss and Stokes.

Unit II

TOPIC NO 8 Ordinary differential Equations of first order and first degree:
 TOPIC NO 9 Exact, linear and Bernoulli's equations,
 TOPIC NO 10 Equations of first order but not of first degree, equation solvable for p,
 TOPIC NO 11 equations solvable for y, equations solvable for x and Clairaut's type.
 TOPIC NO 12 Second order linear differential equations with variable coefficients,
 TOPIC NO 13 method of variation of parameters,
 TOPIC NO 14 Cauchy-Euler equation; Power series solutions;
 TOPIC NO 15 Legendre polynomials, Bessel functions of the first kind and their properties.

Unit III

TOPIC NO 16 Cauchy-Riemann equations, analytic functions,
 TOPIC NO 17 harmonic functions, finding harmonic conjugate;
 TOPIC NO 18 elementary analytic functions (exponential, trigonometric, logarithm) and their properties;
 TOPIC NO 19 Conformal mappings,
 TOPIC NO 20 Mobius transformations and their properties.

Unit IV

TOPIC NO 21 Contour integrals, Cauchy-Goursat theorem (without proof),
 TOPIC NO 22 Cauchy Integral formula (without proof),
 TOPIC NO 23 Liouville's theorem and Maximum-Modulus theorem (without proof);
 TOPIC NO 24 Taylor's series, Laurent's series; zeros of analytic functions,
 TOPIC NO 25 singularities, Residues, Cauchy Residue theorem (without proof),
 TOPIC NO 26 Evaluation of definite integral involving sine and cosine,
 TOPIC NO 27 Evaluation of certain improper integrals using the Bromwich contour.

Course outcomes:

1. The students will learn evaluating multiple integrals and apply it in calculating area and volumes.
- 2 They will solve first and second order differentiation equations.
- 3 They are familiar with analytical functions and their applications.
4. The students will know the concepts of singularity and residue and apply these concepts in evaluating definite integrals

Text Books:

1. Erwin Kreyszig, Advanced Engineering Mathematics, 9th Edition, John Wiley & Sons, 2006.
2. N.P. Bali and Manish Goyal, A text book of Engineering Mathematics, Laxmi Publications, Reprint, 2008.
3. B.S. Grewal, Higher Engineering Mathematics, Khanna Publishers, 36th Edition,

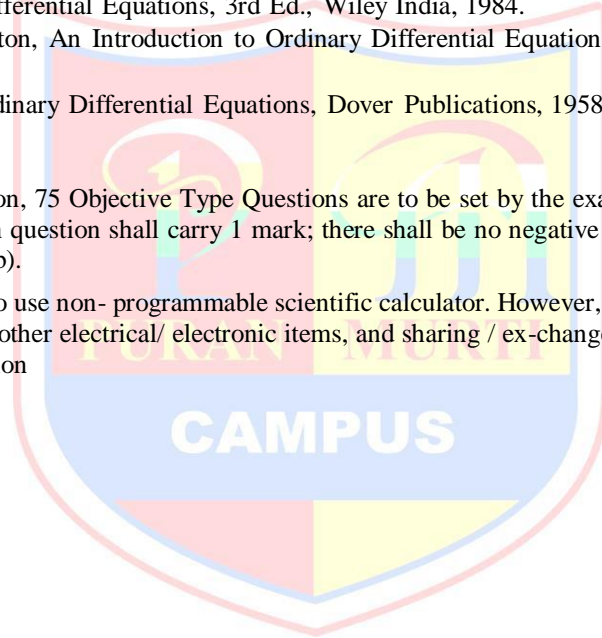

Reference Books:

1. G.B. Thomas and R.L. Finney, Calculus and Analytic geometry, 9th Edition, Pearson Education.
2. W. E. Boyce and R. C. DiPrima, Elementary Differential Equations and Boundary Value Problems, 9th Edition, Wiley India, 2009.
3. S. L. Ross, Differential Equations, 3rd Ed., Wiley India, 1984.
4. E. A. Coddington, An Introduction to Ordinary Differential Equations, Prentice Hall India, 1995.
5. E. L. Ince, Ordinary Differential Equations, Dover Publications, 1958.

NOTES:

1. For the semester examination, 75 Objective Type Questions are to be set by the examiner, to be answered in 1.5 hours by the examinees. Each question shall carry 1 mark; there shall be no negative marking. The questions shall be set based on the clause 11(b).

The students will be allowed to use non- programmable scientific calculator. However, programmable calculators, mobile phones or other electrical/ electronic items, and sharing / ex-change of calculators are prohibited in the examination

B.Tech. Semester-I/II (Common for ECE, ME, AE and AERO)
PHY101C INTRODUCTION TO ELECTROMAGNETIC THEORY

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	1	-	4	25	75	3 hours	100

UNIT – I: Electrostatics in vacuum and linear dielectric medium

TOPIC NO 1 Calculation of electric field and electrostatic potential for a charge distribution

TOPIC NO 2 Divergence and curl of electrostatic field;

TOPIC NO 3 Laplace's and Poisson's equations for electrostatic potential Boundary conditions of electric field and electrostatic potential;

TOPIC NO 4 energy of a charge distribution and its expression in terms of electric field.

TOPIC NO 5 Electrostatic field and potential of a dipole.

TOPIC NO 6 Bound charges due to electric polarization;

TOPIC NO 7 Electric displacement; boundary conditions on displacement.

UNIT – II: Magneto statics

TOPIC NO 8 Bio-Savart law, Divergence and curl of static magnetic field;

TOPIC NO 9 vector potential and calculating it for a given magnetic field using Stokes' theorem;

TOPIC NO10 the equation for the vector potential and its solution for given current densities

TOPIC NO 11 Magnetostatics in a linear magnetic medium:

TOPIC NO 12 Magnetization and associated bound currents; auxiliary magnetic field;

TOPIC NO 13 Boundary conditions on B and H.

TOPIC NO 14 Solving for magnetic field due to simple magnets like a bar magnet;

TOPIC NO 15 magnetic susceptibility and ferromagnetic,

TOPIC NO 16 paramagnetic and diamagnetic materials.

UNIT – III: Faraday's law and Maxwell's equations

TOPIC NO 17 Faraday's law in terms of EMF produced by changing magnetic flux;

TOPIC NO 18 equivalence of Faraday's law and motional EMF;

TOPIC NO 19 Lenz's law; Electromagnetic braking and its applications;

TOPIC NO 20 Differential form of Faraday's law; energy stored in a magnetic field.

TOPIC NO 21 Continuity equation for current densities;

TOPIC NO 22 Modified equation for the curl of magnetic field to satisfy continuity equation;

TOPIC NO 23 displacement current and magnetic field arising from time-dependent electric field;

TOPIC NO 24 Maxwell's equation in vacuum and non-conducting medium;

TOPIC NO 25 Energy in an electromagnetic field;

TOPIC NO 26 Flow of energy and Poyntingvector.

UNIT – IV: Electromagnetic waves and Transmission lines

TOPIC NO 27 The wave equation; Plane electromagnetic waves in vacuum,

TOPIC NO 28 their transverse nature and polarization;

A Unit of Puran Murti Educational Society
Approved by AICTE ,Recognized Under Section 2 (f) by UGC
Affiliated to Deenbandhu Chhotu Ram University of Science
And Technology, Murthal, Sonipat

And Technology, Murthal, Sonipat

TOPIC NO 29 relation between electric and magnetic fields of an electromagnetic wave;

And Technology, Murthal, Sonapat

TOPIC NO 30 energy carried by electromagnetic waves and examples.

TOPIC NO 31 Momentum carried by electromagnetic waves and resultant pressure.

TOPIC NO 32 Introduction, Basic Principles of Transmission Lines,

TOPIC NO 33 Equivalent Circuit Representation,

TOPIC NO 34 General Transmission Line Equation,

TOPIC NO 35 Wave Characteristics on Finite Transmission Lines,

TOPIC NO 36 Transients on Transmission lines, Primary Constant.

Department: Civil Engineering Subject:
Subject :MECHANICS
Subject Code: PHY103C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	1	-	4	25	75	3 hours	100

UNIT I: Vector Mechanics of Particles

TOPIC NO 1 Transformation of scalars and vectors under Rotation transformation;
 TOPIC NO 2 Forces in Nature;
 TOPIC NO 3 Newton's laws and its completeness in describing particle motion;
 TOPIC NO 4 Form invariance of Newton's Second Law;
 TOPIC NO 5 Solving Newton's equations of motion in polar coordinates;
 TOPIC NO 6 Problems including constraints and friction;
 TOPIC NO 7 Extension to cylindrical and spherical coordinates.

UNIT II: Mechanics of Particles in Motion and Harmonic Motion

TOPIC NO 8 Potential energy function; $F = - \text{Grad } V$, equipotential surfaces and meaning of gradient;
 TOPIC NO 9 Conservative and non-conservative forces, curl of a force field;
 TOPIC NO 10 Central forces; Conservation of Angular Momentum;
 TOPIC NO 11 Energy equation and energy diagrams;
 TOPIC NO 12 Elliptical, parabolic and hyperbolic orbits;
 TOPIC NO 13 Kepler problem; Application:
 TOPIC NO 14 Satellite manoeuvres;
 TOPIC NO 15 Non-inertial frames of reference;
 TOPIC NO 16 Rotating coordinate system: Five-term acceleration formula.
 TOPIC NO 17 Centripetal and Coriolis accelerations;
 TOPIC NO 18 Applications: Weather systems, Foucault pendulum;
 TOPIC NO 19 Harmonic oscillator;
 TOPIC NO 20 Damped harmonic motion – over-damped, critically damped and lightly- damped oscillators;
 TOPIC NO 21 Forced oscillations and resonance.

UNIT III: Rigid Body Mechanics

TOPIC NO 22 Definition and motion of a rigid body in the plane;
 TOPIC NO 23 Rotation in the plane;
 TOPIC NO 24 Kinematics in a coordinate system rotating and translating in the plane;
 TOPIC NO 25 Angular momentum about a point of a rigid body in planar motion;
 TOPIC NO 26 Euler's laws of motion, their independence from Newton's laws,
 TOPIC NO 27 their necessity in describing rigid body motion; Examples.
 TOPIC NO 28 Introduction to three-dimensional rigid body motion—
 TOPIC NO 29 only need to highlight the distinction from two-dimensional motion in terms of
 (a) Angular velocity vector, and its rate of change and
 (b) Moment of inertia tensor; Three-dimensional motion of a rigid body wherein all Points move in a coplanar manner: e.g. Rod executing conical motion with center of mass fixed — only need to show that this motion looks two dimensional but is three dimensional, and two dimensional formulation fails.

UNIT IV: Statics of Solids

TOPIC NO 30 Free body diagrams with examples on modeling of typical supports and joints;
 TOPIC NO 31 Condition for equilibrium in three- and two- dimensions;
 TOPIC NO 32 Friction: limiting and non-limiting cases;
 TOPIC NO 33 Force displacement relationship;

And Technology, Murthal, Sonapat

TOPIC NO 34 Geometric compatibility for small deformations;

TOPIC NO 35 Illustrations through simple problems on axially loaded members like trusses.

Department: For EE

Subject: WAVES OPTICS AND QUANTUM MECHANICS

Subject Code: PHY107C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	1	-	4	25	75	3 hours	100

UNIT – I: Wave and Light Motion

TOPIC NO 1 Waves: Mechanical and electrical simple harmonic oscillators,

TOPIC NO 2 damped harmonic oscillator,

TOPIC NO 3 forced mechanical and electrical oscillators,

TOPIC NO 4 impedance, steady state motion of forced damped harmonic oscillator

TOPIC NO 5 Non-dispersive transverse and longitudinal waves:

TOPIC NO 6 Transverse wave on a string, the wave equation on a string,

TOPIC NO 7 Harmonic waves, reflection and transmission of waves at a boundary,

TOPIC NO 8 impedance matching, standing waves and their Eigen frequencies,

TOPIC NO 9 longitudinal waves and the wave equation for them, acoustics waves.

TOPIC NO 10 Light and Optics: Light as an electromagnetic wave and Fresnel equations,

TOPIC NO 11 reflectance and transmittance,

TOPIC NO 12 Brewster's angle,

TOPIC NO 13 Total internal reflection and evanescent wave.

UNIT – II: Wave Optics and Lasers

TOPIC NO 14 Wave Optics: Huygens' principle,

TOPIC NO 15 superposition of waves and interference of light by wave-front splitting and amplitude splitting;

TOPIC NO 16 Young's double slit experiment,

TOPIC NO 17 Newton's rings, Michelson interferometer.

TOPIC NO 18 Farunhofer diffraction from a single slit and a circular aperture,

TOPIC NO 19 criterion for limit of resolution and its application to vision;

TOPIC NO 20 Diffraction gratings and their resolving power.

TOPIC NO 21 Lasers: Einstein's theory of matter radiation interaction and A and B coefficients;

TOPIC NO 22 amplification of light by population inversion,

TOPIC NO 23 different types of lasers: gas lasers (He-Ne, CO), solid-state lasers (ruby, Neodymium), dye lasers;

TOPIC NO 24 Properties of laser beams: mono-chromaticity.

UNIT – III: Introduction to Quantum Mechanics

TOPIC NO 25 Wave nature of Particles,

TOPIC NO 26 Time-dependent and time-independent Schrodinger equation for wave function,

TOPIC NO 27 Born interpretation, probability current,

TOPIC NO 28 Expectation values, Free-particle wave function and wave-packets,

TOPIC NO 29 Uncertainty principle.

TOPIC NO 30 Solution of stationary-state Schrodinger equation for one dimensional problems—particle in a box,

TOPIC NO 31 particle in attractive delta-function potential,

TOPIC NO 32 square-well potential, linear harmonic oscillator.

TOPIC NO 33 Scattering from a potential barrier and tunneling;

And Technology, Murthal, Sonipat

TOPIC NO 34 related examples like alpha- decay,

TOPIC NO 35 field- ionization and scanning tunneling microscope,

TOPIC NO 36 tunneling in semiconductor structures.

UNIT – IV: Introduction to Solids and Semiconductors

TOPIC NO 37 Free electron theory of metals,

TOPIC NO 38 Fermi level, density of states in 1, 2 and 3 dimensions,

TOPIC NO 39 Bloch's theorem for particles in a periodic potential,

TOPIC NO 40 Kronig-Penney model and origin of energy bands.

TOPIC NO 41 Types of electronic materials: metals, semiconductors, and insulators.

TOPIC NO 42 Intrinsic and extrinsic semiconductors,

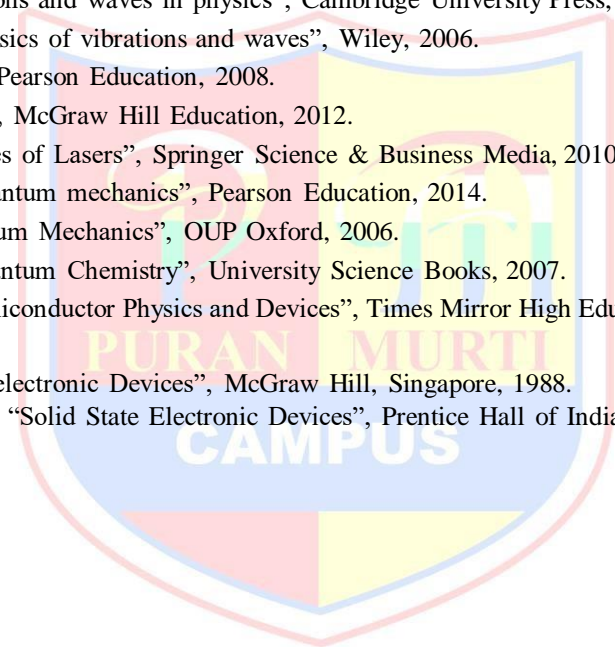

TOPIC NO 43 Dependence of Fermi level on carrier-concentration and temperature

TOPIC NO 44 Carrier generation and recombination,

TOPIC NO 45 Carrier transport: diffusion and drift, p -n junction.

UNIT – I: Electronic Materials

TOPIC NO 1 Free electron theory, Density of states and energy band diagrams,
 TOPIC NO 2 Kronig-Penny model (to introduce origin of band gap),
 TOPIC NO 3 Energy bands in solids, E-k diagram, Direct and indirect band gaps,
 TOPIC NO 4 Types of electronic materials: metals,
 TOPIC NO 5 semiconductors, and insulators, Density of states,
 TOPIC NO 6 Occupation probability, Fermi level
 TOPIC NO 7 Effective mass, Phonon

UNIT – II: Semiconductors

TOPIC NO 8 Intrinsic and extrinsic semiconductors
 TOPIC NO 9 Dependence of Fermi level on carrier-concentration and temperature
 TOPIC NO 10 Carrier generation and recombination,
 TOPIC NO 11 Carrier transport: diffusion and drift, p-n junction,
 TOPIC NO 12 Metal-semiconductor junction (Ohmic and Schottky),
 TOPIC NO 13 Semiconductor materials of interest for optoelectronic devices.

UNIT – III: Light-Semiconductor Interaction

TOPIC NO 14 Optical transitions in bulk semiconductors:
 TOPIC NO 15 absorption, spontaneous emission, and stimulated emission;
 TOPIC NO 16 Joint density of states, Density of states for photons,
 TOPIC NO 17 Transition rates (Fermi's golden rule), Optical loss and gain;
 TOPIC NO 18 Photovoltaic effect, Exciton, Drude model.

UNIT – IV: Measurements & Engineered Semiconductor Materials

TOPIC NO 19 Four-point probe and van der Pauw measurements for carrier density,
 TOPIC NO 20 resistivity, and hall mobility;
 TOPIC NO 21 Hot-point probe measurement, capacitance-voltage measurements,
 TOPIC NO 22 parameter extraction from diode I-V characteristics,
 TOPIC NO 23 DLTS, band gap by UV-Vis spectroscopy, absorption/transmission.
 TOPIC NO 24 Density of states in 2D, 1d and 0D (qualitatively).
 TOPIC NO 25 Practical examples of low-dimensional systems such as quantum wells, wires, and dots:
 TOPIC NO 26 design, fabrication, and characterization techniques.
 TOPIC NO 27 Hetero junctions and associated band-diagrams

UNIT-I: Atomic and molecular structure:

TOPIC NO 1 Schrodinger equation.

TOPIC NO 2 Particle in a box solutions and their applications for conjugated molecules and nano particles.

TOPIC NO 3 Forms of the hydrogen atom wave functions and the plots of these functions to explore their spatial variations(derivation excluded).

TOPIC NO 4 Molecular orbitals of diatomic molecules and plots of the multicenter orbitals.

TOPIC NO 5 Molecular orbital energy level diagrams of diatomic.

TOPIC NO 6 Pi-molecular orbitals of butadiene and benzene .

TOPIC NO 7 Crystal field theory and the energy level diagrams for transition metal ions .

TOPIC NO 8 Band structure of solids and the role of doping on band structures.

Periodic properties:

TOPIC NO 9 Effective nuclear charge, penetration of orbitals,

TOPIC NO 10 variations of s, p, d and f orbital energies of atoms in the periodic table,

TOPIC NO 11 electronic configurations, atomic and ionic sizes,

TOPIC NO 12 ionization energies, electron affinity and electro negativity,

TOPIC NO 13 polarizability, oxidation states.

UNIT-II: Stereochemistry:

TOPIC NO 14 Representations of 3 dimensional structures,

TOPIC NO 15 structural isomers and stereoisomers Configurations,

TOPIC NO 16 symmetry chirality, enantiomers, diastereomers.

TOPIC NO 17 Optical activity, absolute configurations and conformational analysis.

TOPIC NO 18 Organic reactions and synthesis of a drug molecule:

TOPIC NO 19 Introduction to reactions involving substitution, addition, elimination,oxidation, reduction,cyclization and ring openings.

TOPIC NO 20 Synthesis of a commonly used drug molecule (Asprin/Paracetamol).

UNIT-II: Intermolecular forces and potential energy surfaces:

TOPIC NO 21 Ionic, dipolar and van der Waals interactions.

TOPIC NO 22 Equations of state of real gases and critical phenomena.

TOPIC NO 23 Potential energy surfaces (with example).Use of free energy in chemical equilibrium:

TOPIC NO 24 Thermodynamic functions: energy, entropy and free energy.

TOPIC NO 25 Estimations of entropy and free energies.

TOPIC NO 26 Free energy and emf. Cell potentials, the Nernst equation and applications.

TOPIC NO 27 Acid base equilibria, oxidation reduction and solubility equilibria.

TOPIC NO 28 Water chemistry. Corrosion.

TOPIC NO 29 Use of free energy considerations in metallurgy through Ellingham diagrams.

UNIT-IV: Spectroscopic techniques and applications:

TOPIC NO 30 Principles of spectroscopy and selection rules.

TOPIC NO 31 Electronic spectroscopy. Fluorescence and its applications in medicine.

TOPIC NO 32 Vibrational and rotational spectroscopy of diatomic molecules and its applications.

A Unit of Puran Murti Educational Society
Approved by AICTE ,Recognized Under Section 2 (f) by UGC
Affiliated to Deenbandhu Chhotu Ram University of Science
And Technology, Murthal, Sonipat

And Technology, Murthal, Sonipat

TOPIC NO 33 Nuclear magnetic resonance and magnetic resonance imaging,

TOPIC NO 34 surface characterisation techniques. Diffraction and scattering.

Suggested Text Books:

- (i) University Chemistry by Bruce M. Mahan, 4th Edition, Pearson Education.
- (ii) Chemistry: Principles and Applications, by M. J. Sienko and R. A. Plane
- (iii) Fundamentals of Molecular Spectroscopy, by C. N. Banwel
- (iv) Engineering Chemistry (NPTEL Web-book), by B. L. Tembe, Kamaluddin and M. S. Krishnan
- (v) Physical Chemistry, by P. W. Atkins
- (vi) Organic Chemistry: Structure and Function by K. P. C. Volhardt and N. E. Schore, 5th Edition.
- (vii) Organic chemistry, by R.T Morrison, R.N Boyd, 7th Edition, Pearson Education.

Course Outcomes

1. The concepts developed in this course will aid in quantification of several concepts in chemistry that have been introduced at the 10+2 levels in schools. Technology is being increasingly based on the electronic, atomic and molecular level modifications. Students will be able to understand these concepts upto advanced level
2. Quantum theory is more than 100 years old and to understand phenomena at nanometer levels, students will be able to understand the description of all chemical processes at molecular levels.

B.Tech. Semester –II (Group-B)
Subject Code BASIC ELECTRICAL ENGINEERING
Subject Code: EE101C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment(Examination)		
L	T	P	Credits	Max. Marks	Max. Mark	Exam Duration	100
3	1	-	4	25	75	3 hours	

Course Objectives:

1. To analyze dc and ac circuits.
2. To design and analyze RLC networks.
3. To appreciate basic knowledge of electric machines.
4. To assimilate elementary knowledge of electric installations.

UNIT-1: DC Circuits & Theorems:

TOPIC NO 1 Basics of electric circuit elements,

TOPIC NO 2 Kirchhoff's laws & its applications including those based on dependent sources,

TOPIC NO 3 Nodal and Loop methods of Analysis,

TOPIC NO 4 Star-Delta and delta-star transformations.

TOPIC NO 5 Network Theorems: Thevenin's theorem,

TOPIC NO 6 Norton's theorem, Superposition theorem,

TOPIC NO 7 Maximum Power transfer theorem.

UNIT-2: Single A.C. Circuits:

TOPIC NO 8 Sinusoidal signal, instantaneous & peak values, average and RMS values,

TOPIC NO 9 form factor, peak factor.

TOPIC NO 10 Concept of Phasors: Rectangular & Polar, Trigonometric & Exponential forms.

TOPIC NO 11 Behaviour of R, L, C components in ac circuits.

TOPIC NO 12 Time domain analysis of first-order RL and RC circuits.

TOPIC NO 13 Series and parallel circuits: Active and reactive power, power factor,

TOPIC NO 14 Resonance in series and parallel circuits.

TOPIC NO 15 Q-factor, cut off frequencies and bandwidth.

TOPIC NO 16 Three Phase Circuits: Phase and line voltages and currents,

TOPIC NO 17 balanced star and delta circuits.

UNIT-3: Electrical Machines:

TOPIC NO 18 Construction, working principle, type, & equation of Single phase Transformer,

TOPIC NO 19 Ideal Transformer, Phasor diagrams of Single-phase Transformer at no load and on load,

TOPIC NO 20 Equivalent circuit, losses, efficiency.

TOPIC NO 21 Three phase Transformer connections. single phase Autotransformer.

TOPIC NO 22 Rotating Machines: Construction,

TOPIC NO 23 operating principle of d.c. motors and its torque speed characteristics.

TOPIC NO 24 Construction and working principle & type of single phase Induction motor & Three-phase Induction motor,

TOPIC NO 25 concept of slip & torque-speed characteristics,

TOPIC NO 26 construction and working of synchronous generators

UNIT-4: Electrical and electronics components:

TOPIC NO 27 Components of LT Switchgear: Switch Fuse Unit (SFU),

TOPIC NO 28 MCB(Miniature Circuit Breaker),

TOPIC NO 29 ELCB(Earth Leakage Circuit Breaker),

TOPIC NO 30 MCCB(Moulded Case Circuit Breaker),

TOPIC NO 31 Types of Wires and Cables, Earthing.

TOPIC NO 32 Types of Batteries,

TOPIC NO 33 Important Characteristics of Batteries.

TOPIC NO 34 Elementary calculations for energy consumption.

TOPIC NO 35 Introduction to power factor improvement and battery backup.

Course Outcomes:

1. Students will be able to analyze dc and ac circuits.
2. Students will be able to solve, design and synthesize electrical networks mathematically.
3. Obtain basic knowledge of electric installations.
4. Imbibe elementary knowledge of electric machines.

TEXT BOOKS:

1. Del Toro, "Principles of Electrical Engineering", 2nd Edition, Pearson Education.
2. D.P.Kothari & I. J. Nagarath, "Basic Electrical Engg", TMH, New Delhi, 3rd edition.
3. B.L. Theraja & A. K. Theraja, "Electrical Technology", (Vol-I, Vol-II), S.Chand.
4. Edward Hughes, "Electrical & Electronics Technology", 10th Edition, Pearson Education.

REFERENCE BOOKS:

1. T.K. Nagsarkar & M.S Sukhija, "Basic Electrical Engineering", OXFORD Uni. Press.2004.
2. L. S. Bobrow, "Fundamentals of Electrical Engineering", Oxford University Press.
3. D.C. Kulshreshtha, "Basic Electrical Engineering", Mc Graw Hill.
4. Hayt & Kemmerly, "Engineering Circuit Analysis", Mc Graw Hill.
5. "Schaum's Outline of Electric Circuits", Mc Graw Hill.
6. A.K.Sawhney. A Course in Electronic Measurements and Instrumentation", Dhanpat Rai & Co.
- 7 S.K. Sahdev, "Basic Electrical Engineering" Pearson Education.

Department: Common for all Branches
Subject: PROGRAMMING FOR PROBLEM SOLVING (Group-A)
Subject Code: CSE101C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
3	0	-	3	25	75	3 hours	100

Unit I

- TOPIC NO 1 Introduction to components of a computer system (disks, memory, processor, where a program is stored and executed, operating system, compilers etc.),
- TOPIC NO 2 Introduction to Programming ,Idea of Algorithm: steps to solve logical and numerical problems.
- TOPIC NO 3 Representation of Algorithm: Flowchart/ Pseudocode with examples. ,
- TOPIC NO 4 From algorithms to programs; source code,
- TOPIC NO 5 variables (with data types) variables and memory locations,
- TOPIC NO 6 Syntax and Logical Errors in compilation, object and executable code.

Unit II

- TOPIC NO 7 Arithmetic expressions and precedence,
- TOPIC NO 8 Conditional Branching and Loops,
- TOPIC NO 9 Writing and evaluation of conditionals and consequent branching ,
- TOPIC NO 10 Iteration and loops Arrays: Arrays (1-D, 2- D),
- TOPIC NO 11 Character arrays and Strings, Functions (including using built in libraries),
- TOPIC NO 12 Parameter passing in functions, call by value,
- TOPIC NO 13 Passing arrays to functions: idea of call by reference

Unit III

- TOPIC NO 14 Recursion: Recursion, as a different way of solving problems.
- TOPIC NO 15 Example programs, such as Finding Factorial,
- TOPIC NO 16 Fibonacci series, Ackerman function etc.
- TOPIC NO 17 Structure: Defining structures and Array of Structures,
- TOPIC NO 18 Pointers: Idea of pointers, Defining pointers,
- TOPIC NO 19 Use of Pointers in self-referential structures, notion of linked list (no implementation)

Unit IV

- TOPIC NO 19 Basic Algorithms: Searching (Linear and binary search),
- TOPIC NO 20 Basic Sorting Algorithms (Bubble, Insertion, Quick sort),
- TOPIC NO 21 Finding roots of equations, notion of order of complexity through example.
- TOPIC NO 22 Programs (no formal definition required)File handling (only if time is available,otherwise should be done as part of the lab)

Suggested Text Books:

1. Byron Gottfried, Schaum's Outline of Programming withC, McGraw-Hill
2. E. Balaguruswamy, Programming in ANSI C, Tata McGraw-Hill

Suggested Reference Books :

1. Brian W. Kernighan and Dennis M. Ritchie, The C Programming Language, 2nd Edition, Pearson Education.

Department: Common for all Branches
Subject: ENGINEERING GRAPHICS AND DESIGN (Group-B)
Subject Code: ME101C

Study Scheme				Evaluation Scheme			Total Marks

L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
1	0	4	3	25	75	3 hours	100

Detailed Contents

- 1** Introduction to Engineering Drawing:
 TOPIC NO 1 Principles of Engineering Graphics and their significance,
 TOPIC NO 2 usage of Drawing instruments, lettering,
 TOPIC NO 3 Conic sections including the Rectangular Hyperbola
 TOPIC NO 4 Cycloid, Epicycloid, Hypocycloid and Involute; Vernier Scales.
- 2** Orthographic Projections:
 TOPIC NO 7 Principles of Orthographic Projections-Conventions –
 TOPIC NO 8 Projections of Points and lines inclined to both planes;
 TOPIC NO 9 Projections of planes inclined Planes - Auxiliary Planes.
- 3** Projections of Regular Solids:
 TOPIC NO 10 those inclined to both the Planes- Auxiliary Views;
 TOPIC NO 11 Draw simple annotation, dimensioning and scale.
 TOPIC NO 12 Floor plans that include: windows, doors,
 TOPIC NO 13 fixtures such as WC, bath, sink, shower, etc.
- 4** Sections and Sectional Views of Right Angular Solids:
- 5** TOPIC NO 14 Prism, Cylinder, Pyramid, Cone – Auxiliary Views;
- 6** TOPIC NO 15 Development of surfaces of Right Regular Solids –
- 7** TOPIC NO 16 Prism, Pyramid, Cylinder and Cone;
 TOPIC NO 17 Draw the sectional orthographic views of geometrical solids
 TOPIC NO 18 objects from industry and dwellings (foundation to slab only).
- 8** Isometric Projections covering
 TOPIC NO 19 Principles of Isometric projection – Isometric Scale, Isometric Views,
 TOPIC NO 20 Conventions; Isometric Views of lines, Planes,
 TOPIC NO 21 Simple and compound TOPIC NO 21 Solids;
 TOPIC NO 22 Conversion of Isometric Views to Orthographic Views and
 Vice-versa
- 9** Overview of Computer Graphics:
 TOPIC NO 23 Listing the computer technologies that impact on graphical communication,
 TOPIC NO 24 Demonstrating knowledge of the theory of CAD software
 TOPIC NO 25 The Menu System,
 TOPIC NO 25 Toolbars (Standard, Object Properties, Draw, Modify),
 TOPIC NO 26 Drawing Area (Background, Crosshairs, Coordinate System),
 TOPIC NO 27 Dialog boxes and windows, Shortcut menus (Button Bars),
 TOPIC NO 28 The Command Line (where applicable),
 TOPIC NO 29 The Status Bar, Different methods of zoom as used in CAD,
 TOPIC NO 30 Select and erase objects, Isometric Views of lines,
 TOPIC NO 31 Planes, Simple and compound Solids.
- 10** Customisation & CAD Drawing:
 TOPIC NO 32 Consisting of set up of the drawing page and the printer,
 TOPIC NO 33 including scale settings, Setting up of units and drawing limits;

A Unit of Puran Murti Educational Society
Approved by AICTE ,Recognized Under Section 2 (f) by UGC
Affiliated to Deenbandhu Chhotu Ram University of Science
And Technology, Murthal, Sonipat

And Technology, Murthal, Sonipat

TOPIC NO 34 ISO and ANSI standards for coordinate dimensioning and tolerance;

And Technology, Murthal, Sonapat

- TOPIC NO NO 35 Snap to objects manually and automatically;
 TOPIC NO 36 Producing drawings by using various coordinate input entry methods to draw straight lines,
 TOPIC NO 37 Applying various ways of drawing circles.
- 11** Annotations, layering & other functions:
 TOPIC NO 38 Applying dimensions to objects, applying annotations to drawings;
 TOPIC NO 39 Setting up and use of Layers, layers to create drawings,
 TOPIC NO 40 Create, edit and use customized layers;
 TOPIC NO 41 Changing line lengths through modifying existing lines
 TOPIC NO 42 Printing documents to paper using the print command;
 TOPIC NO 43 orthographic projection techniques;
 TOPIC NO 44 Drawing sectional views of composite right regular geometric solids and project the true shape of the sectioned surface;D) Software
 TOPIC NO 45 Drawing annotation, Computer-aided design

2	Processes and Materials of Manufacture	Gowri P. Hariharan and A. Suresh Babu	Prentice Hall, India
3	Manufacturing Technology, Vol. I and II	Roy A. Lindberg	Tata McGraw Hill

Course Outcomes

The content delivery through lectures will enable the student to learn:

- The knowledge of the different manufacturing processes which are commonly employed in the industry, to fabricate components using different materials.

The laboratory practices will enable the student:

- To decide about the appropriate methods and tool for manufacturing a given product/job which gives the desired dimensional accuracies and dimensional tolerances.
- Fabricate components with their own hands safely while working with different machine tools and hand tools.
- By assembling different components, they will be able to produce small devices of their interest.

B.Tech. Semester II (Common for All Branches)
Subject Code: ENGLISH LANGUAGE LAB (Group-B)
Subject Code: HUM103C

L	T	P	Credits	Class Work	:	25 Marks
0	0	2	1	Examination	:	75 Marks
				Total	:	100 Marks
				Duration of Examination	:	3 Hours

Course Objectives:

1. To develop English language skills especially speaking and listening of the students
2. To make the students excel in their professional lives through proficiency in communication
3. To enhance the students linguistic and communicative competence
4. To enable them to face the challenges of professional and social life

Course Outcomes:

The Students will be able to

1. Acquire basic proficiency in Spoken English
2. Enhance their listening skills with listening comprehension exercises
3. Polish their speaking skills in English both at social and professional platforms
4. Present themselves confidently and meaningfully in professional and social circles.

Course Contents:

- (i) Listening comprehension
- (ii) Recognition of phonemes in International Phonetic Alphabet
- (iii) Self introduction and introduction of another person
- (iv) Conversation and dialogues in common everyday situations
- (iv) Communication at workplace (Standard phrases and sentences in various situations)
- (vi) Telephonic communication
- (vii) Speeches for special occasions (Welcome speeches, Introduction speeches, Felicitation speeches and Farewell speeches)
- (viii) Tag Questions
- (ix) Formal Presentations on literary texts prescribed in theory paper

Note: Three hour time to each segment is recommended for instruction and practice.

Approved by Board of UG Studies, Department of Humanities on 19 March 2018

Scheme of End Semester Practical Exam:

1. A small passage may be read out to the examinees and they will have to write the answers to the questions asked at the end of the passage. Questions will be short answer type.
2. Examinees may be asked to identify the sounds of phonemes in given words.
3. Examinees may be asked to introduce themselves or others, participate in role play activities in mock situations, give short responses, engage in hypothetical telephonic conversation or supply the tag questions to statements etc.
4. Examinees may also be asked to deliver speeches on given situations or make presentation on the literary texts prescribed in Unit IV of theory paper.

Recommended Readings:

1. Bhatnagar, Nitin and Mamta Bhatnagar. Communicative English for Engineers and Professionals. Pearson Education, 2013.
2. Swan, Michael. Practical English Usage. OUP, 1995.
3. Gangal, J.K. Practical Course in Spoken English. New Delhi: PHI Learning, 2015.
4. Konar, Nira. Communication Skills for Professionals. New Delhi: PHI Learning Pvt. Ltd., 2009.
5. Bansal, R.K. and J.B. Harrison. Spoken English. Orient Longman, 1983.
6. Sharma, Sangeeta and Binod Mishra. Communication Skills for Engineers and Scientists. Delhi: PHI Learning Pvt. Ltd., 2015.

Department: For ECE, ME, AE and AERO
Subject: INTRODUCTION TO ELECTROMAGNETIC THEORY LAB.
Subject Code: PHY111C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
0	0	2	1	25	75	3 hours	100

Syllabus:

Note: Students will be required to learn to take readings of vernier calliper, screw gauge, spherometer, spectrometer etc. during their orientation labs at the starting and will have to perform at least ten subject related experiments in a semester

Basic experiments on least count and error estimation (during orientation)

1. To aware about the least count of vernier calliper and screw gauge and to find the thickness of a slide using vernier calliper and diameter of wire using screw gauge.
2. Calculation of radius of curvature of a convex surface using spherometer.
3. Angel measurement using spectrometer.

List of Subject related Experiments:

1. To study Hall effect in semiconductors and measure the Hall coefficient.
2. To find frequency of AC mains using sonometer.
3. To study the magnetic properties of materials using B-H curve.
4. To study the Curie temperature of materials using Dielectric set up.
5. To verify the inverse square law with the help of a photovoltaic cell.
6. To determine Planck's constant using photocell.
7. To study the characteristics of Solar cell and find out the fill factor.
8. To design and study Active and Passive filters.
9. To find impedance and Q factor using LCR circuit.
10. To study resonance phenomena in LCR circuit.
11. To measure e/m of electron using helical method.
12. To find temperature coefficient of platinum using Callender Griffith bridge.
13. To study the forward and reverse characteristics of P-N junction diode.
14. To study the reverse characteristics of Zener diode and voltage regulation using Zener Diode

Department: For Civil Engineering Subject:
MECHANICS LAB.
Subject Code: PHY113C

Study Scheme				Evaluation Scheme			Total Marks

1. To aware about the least count of vernier calliper and screw gauge and to find the thickness of a slide using vernier calliper and diameter of wire using screwgauge.
2. Calculation of radius of curvature of a convex surface using spherometer.
3. Angel measurement using spectrometer.

List of Subject related Experiments:

1. To find the moment of inertia measurement of a fly wheel.
2. To find acceleration due to gravity using bar pendulum.
3. To study resonance phenomena in mechanical oscillators.
4. To examine the behaviour of coupled pendulum.
5. To examine air track experiment and study Collisions between objects, governed by the laws of momentum and energy.
6. To find the modulus of rigidity of a wire using Maxwell's Needle.
7. To determine the moment of inertia of the given disc using Torsion pendulum.
8. To perform experiment on Rotation and Gyroscopic Precession.
9. To measure spring constant using Hook's Law.
To measure height of a distant object using sextant.

List of Subject related Experiments:

1. To find out wavelength of monochromatic light using Newton's ring experiment.
2. To find out wavelength of monochromatic light using Diffraction grating.
3. To find out wavelength of monochromatic light using Freshnel's bi-pris
4. To study interference phenomena using Michelson's Interferometer and to find out wavelength of monochromatic light.
5. To find specific rotation of sugar using Polarimeter
6. To find thickness of hair using He-Ne laser.
7. To find Cauchy's constants of a prism by using spectrometer.
8. To find resolving power of a telescope
9. To determine Planks constant using photocell.
10. To study the characteristics of solar cell and find out the fill factor.
11. To verify the inverse square law with the help of a photovoltaic cell
12. To study Zeeman splitting using EPS/ ESR

3. Angel measurement using spectrometer.

List of Subject related Experiments:

1. To study the forward and reverse characteristics of P-N junction diode.
2. To study the characteristics of transistor in common base configuration.
3. To study the characteristics of transistor in common emitter configuration.
4. To study the characteristics of Junction field effect (JFET) transistor.
5. To study the characteristics of Metal oxide semiconductor field effect (MOSFET) transistor.
6. To study the characteristics of Solar cell and find out the fill factor.
7. To design and study Active and Passive filters.
8. To study the reverse characteristics of Zener diode and voltage regulation using Zener Diode.
9. To determine Planks constant using photocell.
10. To measure e/m of electron using helical method.
11. To find capacitance of condenser using fleshing and quenching experiment.
12. To find temperature co-efficient of platinum using Callender Griffith bridge.
13. To find out low resistance by Carry Foster bridge.
14. To find resistance of galvanometer by post office box.
15. To compare the capacitance of two capacitors using De'Sauty Bridge.

Department: COMMON FOR ALL BRANCHES
Subject: CHEMISTRY LAB (Group-A)
Subject Code: CH103C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
0	0	2	1	25	75	3 hours	100

LIST OF EXPERIMENTS:

- Determination of surface tension of given solvent by stalgmometer.
- Removal of Ca^{2+} and Mg^{2+} hardness from given water sample using ion exchange coloumn.
- Calculate the Rf value of given sample using thin layer chromatography.
- Calculate the strength of strong acid by titrating it with strong base using conductometer.
- Calculate the e.m.f value of given cell.
- Prepare the sample of urea formaldehyde and phenol formaldehyde.
- Determination of chloride content in given water sample.
- To study the kinetics of ethyl acetate with NaOH.
- Preparation of aspirin.
- Calculate the specification value of given oil sample.
- Chemical analysis of two anions and two cations in given sample of salt.
- Determination of the partition coefficient of a substance between two immiscible Liquids.
- Determine the alkalinity of given water sample .
- Study the adsorption phenomena using acetic acid and charcoal.
- Lattice structures and packing of spheres.
- Determine the viscosity of given liquid using Ostwald viscometer.
 - The chemistry laboratory course will consist of experiments illustrating the principles of chemistry relevant to the study of science and engineering.
 - The students will learn to: Estimate rate constants of reactions from concentration of reactants/products as a function of time.
 - Measure molecular/system properties such as surface tension, viscosity, conductance of solutions, redox potentials, chloride content of water, etc. Synthesize a small drug molecule and analyse a salt sample

Note: At least 10-12 experiments are to be performed by the students

- Each laboratory class/section shall not be more than about 20 students.
- To allow fair opportunity of practical hands on experience to each student, each experiment may either done by each student individually or in group of not more than 3-4 students. Larger groups be strictly discouraged/disallowed.
- Pre-experimental & post experimental quiz/questions may be offered for each lab experiment to reinforce & aid comprehension of the experiment.

Suggested Books:

- A Text book on Experiments and Calculation –Engineering Chemistry by S.S.Dara, S.Chand & Company Ltd.
- Essential of Experimental Engineering chemistry, Shashi Chawla, Dhanpat Rai Publishing Co.
- Theory & Practice Applied Chemistry – O.P.Virman, A.K. Narula (New Age)

Department: COMMON FOR ALL BRANCHES**Subject: BASIC ELECTRICAL ENGINEERING LAB. (Group-B)****Subject Code: EE105C**

L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
0	0	2	1	25	75	3 hours	100

LIST OF EXPERIMENTS

1. To study frequency response of a series R-L-C circuit and determine resonant frequency & Q-factors for various Values of R, L, C.
2. To study frequency response of a parallel R-L-C circuit and determine resonant frequency & Q-Factors for various values of R, L, C.
3. To perform Open circuit & Short circuit Tests on single phase Transformer.
4. To plot torque- speed characteristic of separately excited DC motor.
5. Demonstration of a DC-DC convertor and DC to AC Convertor and also draw PWM waveform.
6. Speed control of induction motor using DC-AC convertor.
7. Demonstration of Components of LT switch gear like MCB, MCCB, SFU, ELCB and earthing.
8. To obtain torque-slip characteristics of three phase induction motor.
9. To perform voltage control of synchronous generator through field excitation.
10. To study transient and steady state time response of RLC series circuits.

Laboratory Outcomes

1. Get an exposure to common electrical components and the ratings.
2. Understand the usage of common electrical measuring instruments.
3. Student will be able to understand and design resonant circuits.
4. Understand the basic characteristics of transformers and electrical machines.

The laboratory should be preceded or followed by one hour of tutorial to explain the approach or algorithm to be implemented for the problem given.

Tutorial 1: Problem solving using computers:

Lab1: Familiarization with programming environment

Tutorial 2: Variable types and type conversions:

Lab 2: Simple computational problems using arithmetic expressions

Tutorial 3: Branching and logical expressions:

Lab 3: Problems involving if-then-else structures

Tutorial 4: Loops, while and for loops:

Lab 4: Iterative problems e.g., sum of series

Tutorial 5: 1D Arrays: searching, sorting:

Lab 5: 1D Array manipulation

Tutorial 6: 2D arrays and Strings

Lab 6: Matrix problems, String operations

Tutorial 7: Functions, call by value:

Lab 7: Simple functions

Tutorial 8 & 9: Numerical methods (Root finding, numerical differentiation, numerical integration):

Lab 8 and 9: Programming for solving Numerical methods problems

Tutorial 10: Recursion, structure of recursive calls

Lab 10: Recursive function

Tutorial 11: Pointers, structures and dynamic memory allocation

Lab 11: Pointers and structures

Tutorial 12: File handling:

Lab 12: File operations

Course Outcomes:

1. To formulate the algorithms for simple problem
2. To translate given algorithms to a working and correct program To be able to correct syntax errors as reported by the compilers
3. To be able to identify and correct logical errors encountered at runtime
4. To be able to write iterative as well as recursive programs
5. To be able to represent data in arrays, strings and structures and manipulate them through a program
6. To be able to declare pointers of different types and use them in defining self-referential structures.
7. To be able to create, read and write to and from simple text files.

Department: COMMON FOR ALL BRANCHES

Subject: INDUCTION PROGRAM

Subject Code: MC101C

Study Scheme				Evaluation Scheme			Total Marks
Lectures per week				Internal Assessment	External Assessment (Examination)		
L	T	P	Credits	Max. Marks	Max. Marks	Exam Duration	
0	0	0	0	25	75	3 hours	100

Course Outcomes:

At the end of this course, students will demonstrate the ability to:

1. Understand self.
2. Inculcate Human Values.
3. Feel inspired for intensive & extensive studies, co-curriculars, career, & life.
4. Nurture a hobby.
5. Dismantle upsets quickly & move forward in life.

Course Curriculum:

1. Each student has to participate in the mandatory Audit (Non-credit) Course INDUCTION PROGRAM of 21 days.
2. Out of these 21 days, initial 07 working days duration shall be dedicated solely to the Induction Program before the start of regular teaching of first semester.
3. The remaining two weeks (14 working days) will be spread over the rest of first semester by allotting 6 periods per week (preferably 2 periods each on Tues., Wed. & Thurs.), however, these periods shall necessarily be in the same slots for all engineering disciplines / branches so that if a common activity is to be planned, the same may be effected / actualized at the Univ. / Institute level.
4. Induction Program comprises of:
 - a) Physical Activities,
 - b) Creative Arts,
 - c) Mentoring And Universal Human Values (UHV's),
 - d) Literary Activities,
 - e) Proficiency Modules,
 - f) Lectures And Workshops by Eminent People,
 - g) Visits to local Areas,
 - h) Familiarization With Respective Dept./ Branch & Institute,
 - i) Co-Curricular Activities in Univ. / College.
5. Each student will maintain a Diary to jot down salient points & scribble associated points lest these may wither & wane away from memory, because each student has to clear an Objective Type Test at the end of this Audit Course.
6. Also, students may keep recording their feedback / rating, on a scale of 1 to 10, of each speaker/ session/ activity in their diary, to reproduce the same in feedback session. The Mentors of resp. groups & Activity In-charges shall from time to time sign on these diaries to monitor progress & attendance.
7. It is expected that students, while coming on to sports arenas, will come in proper sports attire (sports shoes, etc.). They may also carry, in a bag/ carry-bag, their formal dress for subsequent sessions.
8. Each Universal Human Values (U.H.V.) Discussion Group shall consist of 20 Students + 2 Senior Student Guides + 1 Faculty Mentor.
9. Venue & Schedule: For cost-effectiveness, the Venue for the Lectures, Proficiency Modules, & common activities, etc. may be kept as Convention Centre/ Auditorium of the Univ./ resp. Institute. The venue for dept.-specific activities may be decided by Chairpersons of resp. Depts. offering these modules.
10. Wake-up call for hostellers shall be from 6:30 a.m.-7:00 a.m. and they shall perform Physical Activities from 7:00 a.m. to 8:00 a.m. in the morning and also for 1 hour in the evening on each working day. If the schedule of Physical Activities for hostellers cannot be followed with rigor by all day-scholars, then a separate schedule for the same may be suitably worked out by the Univ. / resp. Institute.

11. Evaluation Scheme:

- a) The Internal Assessment / Sessional / Class-work Marks shall be awarded for 25 marks by the mentor (for each group of about 20 students of respective branch/ discipline) based on candidate's regularity, attendance, diary work, assignments & enthusiastic participation in various activities of the Induction Program. These marks shall be collected (from each of the mentors of a group of about 20 students of resp. branch) by the senior-most mentor (or by the Class In-charge of 1st Year of the concerned branch/ discipline, as decided by Univ./ concerned Institute) who may upload the Sessional / Internal Assessment / Class-work Marks on the Univ. portal.
- b) There will be an end-semester examination of 75 marks based on selected chapters of the Text Books / References, and the B.Tech. Ordinance of the Univ., and on the life and achievements of State & National Heroes.
- c) Any student failing in the Sessional / Class-work / Internal Assessment and / or in the end-semester examination of Induction Program shall have to reappear and pass as per provisions of the B.Tech. Ordinance.

12. Any student failing of the Induction Program shall have to Preparing for the Conduct of the Program:

- a) Univ. / Each Institute may appoint a Faculty in-charge called Chief Coordinator, Induction Program, who shall prepare the Schedule of 1st Week & shall be responsible, along with his team (which shall necessarily include Faculty Mentors defined in this paragraph, besides other members), for its execution. Further, each Dept. may appoint one Faculty Mentor for each group of 20 first year students of each branch. The senior-most amongst such Faculty Mentors of a Dept. / branch (or the Class In-charge of 1st year of respective branch) shall, in association with other mentor(s), if any, of respective branch shall prepare, within the overall mandate of the Induction Program, the Schedule for the rest of the Semester & shall be responsible for its execution & also for Internal Assessment/ Class- work Marks award and upload. The Chief Coordinator may hold meetings of mentors periodically.
- b) Training program(s) for Chief Coordinator & faculty mentors may be conducted by Univ./ resp. Institute on how to mentor students based on universal human values, & imparting holistic education & larger vision of life.
